Portfolio: <https://jamiul-portfolio.vercel.app>

TECHNICAL SKILLS

Programming Languages

Python, Java, JavaScript, C/C++

Artificial Intelligence & Machine Learning

Machine Learning, TensorFlow (Basic), Scikit-learn, XGBoost, NumPy, Pandas, Data Preprocessing, Feature Engineering, Model Evaluation

Web Development

JavaScript, React, Vite, Tailwind CSS, HTML, CSS

Database

MySQL

Development Tools

Git/GitHub, Linux (Ubuntu), VS Code, Jupyter Notebook

SOFT SKILLS

- Problem Solving
- Analytical Thinking
- Communication
- Teamwork
- Continuous Learning

LANGUAGE

- Bengali — Native
- English — Professional
- Hindi — Conversational

Profile

Computer Science and Engineering graduate with a strong foundation in Artificial Intelligence, Machine Learning, and Python programming. Experienced in developing machine learning models and data-driven applications using Python, Scikit-learn, TensorFlow, and XGBoost. Currently working as a Software Engineer at the Army War Game Centre (AWGC), contributing to Python-based software and GIS applications. Passionate about applying AI to solve real-world problems and continuously learning Large Language Models (LLMs).

Education

Sonargaon University

(2021-2025)

Dhaka, Bangladesh.

Bachelor's in Computer Science and Engineering |

CGPA: 3.93

Relevant Coursework: Artificial Intelligence, Machine Learning, Pattern Recognition, Data Structures & Algorithms, Database Management Systems, Computer Networks, Operating Systems.

Thesis: Design and Implementation of a Robot Car Based on ATmega328P

Work Experience

Software Engineer

(June, 2026-present)

Army War Game Centre, Bangladesh Army

- Developed Python applications for internal GIS workflows.
- Processed geospatial datasets using GeoPandas and Rasterio.
- Collaborated with engineers to improve software reliability.

Technologies: Python, NumPy, GeoPandas, Rasterio, GIS

Project Work

Calories Burnt Prediction

Built and evaluated regression models to predict calories burned. Performed preprocessing, feature engineering, and selected XGBoost based on performance.

Tech Stack: Python, Pandas, Scikit-learn, XGBoost

COVID-19 Chest X-ray Classification

Developed a deep learning model for chest X-ray image classification using TensorFlow.

Tech Stack: Python, Matplotlib, TensorFlow

Movie Recommendation System

Implemented a recommendation engine using collaborative filtering and similarity-based techniques.

Tech Stack: Python, Pandas, NumPy, Matplotlib, Scikit-learn

Two-Agent Competitive Snake Game

Designed intelligent gameplay using the A* pathfinding algorithm and object-oriented programming.

Tech Stack: Python, Pygame

Robot Car Based on ATmega328P

Designed and implemented an autonomous robot car with obstacle avoidance and Bluetooth control as the undergraduate thesis.

Tech Stack: Arduino, ATmega328P, Embedded C

Achievements

- Vice-Chancellor Gold Medal Recipient
- Graduated with CGPA 3.93/4.00
